All About **Claude Code** -- Part Two.

EDMUND'S MASTERMIND | EPISODE 2 OF 3

Claude Code for Daily Real Estate Work

Run Your Listing Business From a Single Terminal Window

COMPLETE IMPLEMENTATION WORKBOOK

THURSDAY, JUNE 11, 2026

EDMUND'S MASTERMIND & GROUP COACHING

Your Money-Making Mission

Why You're Here

To turn your daily production grind into a 20-minute morning routine — listing kits, lead follow-ups, and content calendars all generated in your voice, on demand.

Your Goal Today

Walk away with three working slash commands (`/listing`, `/lead`, `/content`) that produce real, ship-ready output.

Success Metric: 15+ hours of weekly production work compressed into 3-4 hours within 30 days.

Workshop Overview: Your Profit-Generating Toolkit

The 3 Systems You'll Master Today:

1. **The Listing Production Engine** — Address in, full marketing kit out, in 60 seconds
2. **The Client Communication System** — One-line lead context → personalized text + email + CRM entry
3. **The Content Multiplication Machine** — One weekly idea → full week across 5 platforms

Series Note

Episode 1 covered Claude Code installation. If you missed it, we cover the basics in the first 10 minutes today. From there we move at full speed. Each episode in this series stands alone — you can attend in any order.

Pro tip: The prompts in this workbook are production-ready. You don't need to "improve" them. Copy them, paste them, ship the output.

The Listing Production Engine

The 8-Hour Listing Marketing Killer

- 💰 Eliminate the 8–12 hours/listing currently spent on marketing copy
- ⌚ Generate complete kits (description + social + email + SMS) in under 60 seconds
- 🚀 Take more listings without the production bottleneck

The Mass-Production Mindset You're Missing

The agents producing 50+ listings per year aren't writing 50 listing descriptions. They're running 50 listings through a single production engine. Same template logic. Different inputs. Voice preserved.

Most agents can't scale beyond 25–30 listings per year — not because of lead flow, but because of the **production bottleneck**. Each listing requires 8–12 hours of marketing copy. That work doesn't scale linearly. It scales catastrophically.

A listing engine inverts the problem. You build the engine once. Every future listing flows through it. The marginal cost of listing #51 is the same as listing #1: 60 seconds.

Why This Changes Everything in Real Estate

Volume agents win listings because of three things: marketing, marketing, and marketing. The agent who shows a seller 20 marketing assets at the listing presentation wins over the agent showing 3.

Until now, that asymmetry only worked for teams with full-time marketing staff. With a properly built listing engine, a solo agent matches the marketing output of a 5-person team — without hiring anyone.

Real Revenue Applications

- New listing kits (description, IG, FB, email, SMS, MLS remarks)
- Just-sold posts with social proof angles
- Price reduction announcements
- Open house promotion sequences
- Coming-soon teasers + launch sequences
- Luxury feature highlights for premium properties

System #1: Profit-Generating Prompts

FOR BUILDING /LISTING (ONE-TIME)

Create a slash command at `.claude/skills/listing/SKILL.md`.

Inputs: property address, beds, baths, sqft, list price, 3-5 standout features.

Outputs (all matching voice-profile.md):

1. MLS-ready description (250-300 words)
2. Public-facing description (120 words, no jargon)
3. Instagram caption (50 words + 8 hashtags + CTA)
4. Facebook post (story-driven, 100-150 words)
5. Just-listed text for buyer prospects (3 lines)
6. Email blast subject line + 100-word body
7. Five hook lines for ad A/B tests

Save as `[property-address]-marketing-kit.md`.

FOR RUNNING THE ENGINE ON A SINGLE LISTING

`/listing 2257 Egret Cove, 3BR/3BA, 1,840 sqft, $725,000. Standout features: golf course view, primary suite with sitting room, chef's kitchen with quartz waterfall island, screened patio, two-car garage.`

FOR JUST-SOLD POSTS

Generate a just-sold social media kit for [property address]. Include: emotional angle (sellers' journey), market angle (days on market, % over/under list), buyer angle (who bought it and why). Output IG, FB, and email versions in my voice.

FOR PRICE REDUCTION

Write a price reduction announcement for [property address], reduced from \$X to \$Y. Frame as opportunity for buyers, not desperation from sellers. Include 1 IG caption, 1 FB post, 1 buyer-network email. My voice.

FOR OPEN HOUSE

Generate an open house promotion sequence for [address] this Saturday [time]. Include: (1) Tuesday tease, (2) Thursday reminder, (3) Saturday morning push, (4) post-event follow-up. Format for IG Stories, FB post, and email each.

FOR COMING-SOON TEASER

Build a 5-day coming-soon launch sequence for [address]. Day 1: tease (silhouette/detail). Day 2: feature reveal. Day 3: neighborhood angle. Day 4: lifestyle hook. Day 5: launch. Each day: IG + FB version. My voice.

| System #1: Your Success Notes

Listings I want to run through the engine this week:

1. _____
2. _____
3. _____

Time savings calculation:

Hours per listing without engine: _____

Hours per listing with engine: _____

Listings per month: _____

Monthly hours saved: _____ × \$ _____ /hr = \$ _____ /month

Voice tweaks I want to make to the engine:

Channels I'll prioritize first:

- ☐ MLS description quality
- ☐ Instagram captions
- ☐ Facebook story-style posts
- ☐ Email blast to buyer database
- ☐ SMS to active prospect list

Field test: Pick ONE active listing today. Run the engine on it. Compare output to what you'd write manually. Note voice misses — those become your engine refinements.

The Client Communication System

The "I'll Follow Up Tomorrow" Killer

- 💰 Convert 2x more leads with consistent, personalized follow-up
- ⌚ Reduce per-contact follow-up time from 5 minutes to 30 seconds
- 🎯 Eliminate the "I forgot to follow up" deal-killer permanently

The Conversion Math Most Agents Ignore

Top 50+ deal/year agents share one trait: **they follow up faster, more often, and more personally** than the field. NAR data shows the average agent follows up 1.3 times before quitting. Top 1%: 12+ touches.

Why most quit at 1.3? Personalized follow-up takes 5 minutes per contact. Five minutes × 50 leads = 4 hours of mental drain. Most won't do it. Top agents will, but it costs them their evenings.

A communication system reduces those 4 hours to 20 minutes. Now the math works. Now you can be the agent who follows up 12 times — without burning out.

Why This Changes Everything in Real Estate

Lead conversion is **frequency × personalization × speed**. Every agent has access to the same leads. The agents who win have follow-up game so consistent that prospects mistake them for already-hired.

Generic templates lose to handwritten follow-up. But personalized AI follow-up — informed by your CRM notes, your voice, the lead's situation — beats handwritten on every metric: speed, consistency, even quality. (Most agents are tired by lead #5. AI never tires.)

Real Revenue Applications

- Cold lead outreach personalized from CRM notes
- Post-showing follow-ups referencing what they actually said
- "Thinking about it" stall-breakers
- New buyer onboarding sequences
- Post-closing thank-yous + anniversary check-ins
- Sphere re-engagement, agent referrals, birthday outreach

System #2: Profit-Generating Prompts

FOR BUILDING /LEAD (ONE-TIME)

Create a slash command at `.claude/skills/lead/SKILL.md`.

Inputs: contact name, last interaction summary (1-2 sentences), what they're looking for, urgency (cold/warm/hot).

Outputs (matching voice-profile.md):

1. Text follow-up (3-4 sentences, casual, references something specific)
2. Email version (longer, value-add, 1 specific market insight)
3. CRM note: "Date | Action | Next Step | Suggested Follow-up Date"
4. Voicemail script if no response in 48 hours

Save as `[contact-name]-followup.md`.

FOR RUNNING ON A SINGLE LEAD

`/lead Sarah Mitchell. Last interaction: showed her 3BR Boca homes Saturday, she liked Royal Palm but worried about HOA. Looking for: 3BR under $850K, good schools. Urgency: warm.`

FOR BULK SPHERE RE-ENGAGEMENT

Read `sphere-list.csv`. For every contact tagged "no contact 90+ days," generate a personalized 3-sentence text. Reference last known interest. Save in `sphere-reengagement-batch.md`, one per contact, name as header.

FOR POST-CLOSING THANK YOU

Write a post-closing thank-you for `[client name]` who closed on `[property address]`. Include: (1) something specific to their journey, (2) a graceful referral ask, (3) a forward-looking touchpoint. My voice.

FOR STALL-BREAKER

`[Client name]` has been "thinking about it" for 3 weeks on listing `[address]`. Write a check-in that doesn't feel pushy but creates light movement. Reference their concern from CRM notes: `[concern]`. Offer a low-stakes next step.

FOR NEW BUYER ONBOARDING

Generate a 5-message onboarding sequence for `[name]`, looking for `[criteria]`. Day 1: welcome + expectations. Day 2: how I work. Day 3: market context. Day 5: first listing rec. Day 7: check-in. My voice. One file.

System #2: Your Success Notes

Leads I'll re-engage this week using the system:

Name	Last Touch	Status	Action

Conversion goal:

_____ leads converted per month using the system

Estimated revenue impact:

\$_____ per month

Sequences I'll standardize first:

- ☐ Cold lead first-touch
- ☐ Post-showing follow-up
- ☐ 30-day sphere re-engagement
- ☐ Post-closing thank-you + anniversary
- ☐ Stall-breaker (week 3-4 of consideration)

Field test: Pick 5 contacts in your CRM right now. Run /lead on each. Send the texts before the session ends. Track replies for 7 days.

The Content Multiplication Machine

The "\$3,000/Month Marketing Agency" Killer

- 💰 Cancel agency retainers without losing content output
- ⌚ Compress weekly content production from 8 hours to 20 minutes
- 🎯 Win the algorithm by publishing volume + quality

The Algorithm Math That Decides Who Wins

Instagram, Facebook, LinkedIn, TikTok, YouTube — all algorithms reward two things:

frequency and **engagement**. Agents who post 5 high-quality posts/week dominate agents who post 1. There's no third option.

Most agents can produce 1 great post per week. They can't produce 5 because each requires fresh research, writing, formatting per platform, hashtag research, scheduling. Eight hours for one weekly idea. That's why most quit consistent posting after 90 days.

A multiplication machine inverts this. You produce 1 strong idea. The machine creates 5 platform-native versions. Eight hours becomes 20 minutes. Frequency goes up. Quality stays high. Algorithm rewards you.

Why This Changes Everything in Real Estate

Real estate is the most local, most relationship-driven business in America. The agents who own their local algorithm own their local market. 87% of buyers begin their search online. Where they land first usually closes the deal.

Volume + quality on local content compounds month over month. Agents who start running this machine in 2026 will own their feeds by 2027. The rest will quietly fall out of the consideration set.

Real Revenue Applications

- Weekly market reports (each platform gets a custom version)
- Neighborhood spotlights (local SEO + social proof)
- Buyer/seller education series
- Just-listed/just-sold reels and posts
- Behind-the-scenes day-in-the-life
- Mastermind/event/book/podcast promotion

System #3: Profit-Generating Prompts

FOR BUILDING /CONTENT (ONE-TIME)

Create a slash command at `.claude/skills/content/SKILL.md`.

Input: one strong content idea (1-2 sentences) + optional supporting data/links.

Outputs (matching voice-profile.md):

1. Instagram caption (100 words + 12 hashtags + CTA)
2. Facebook post (story-driven, 150-200 words)
3. LinkedIn post (insight-led, 200-250 words, professional tone)
4. YouTube Community post + 60-second video script
5. Email-newsletter version (subject line + 200-word body)
6. Twitter/X thread (4-6 tweets)

Save as `content-[topic-slug]-[date].md`.

FOR RUNNING ON A WEEKLY IDEA

`/content` Boca Raton single-family median price hit \$1.85M in April, up 6.2% YoY. Inventory still 32% below 2019 levels. Implications for sellers and buyers heading into summer.

FOR NEIGHBORHOOD SPOTLIGHT

`/content` Spotlight on Royal Palm Yacht & Country Club. Cover: history, lifestyle, current inventory price ranges, who buys here and why, common buyer questions answered.

FOR JUST-SOLD STORY

`/content` Just-sold story for [address]. Sold \$X over list in Y days, X offers. Highlight: market signal, buyer journey angle, what made it sell.

FOR BUYER EDUCATION

`/content` Buyer education topic: "Why pre-approval letters from non-local lenders cost you offers in South Florida." Include 3 reasons local lenders win, what to ask, the offer-strength angle.

FOR SELLER EDUCATION (LISTING MAGNET)

`/content` Seller education: "The 3 staging investments that actually move the needle in a luxury condo sale (and the 5 that don't)." Frame as insider intelligence with before/after framing.

| System #3: Your Success Notes

This week's content idea:

Platforms I'll publish to:

- ☐ Instagram
- ☐ Facebook
- ☐ LinkedIn
- ☐ YouTube
- ☐ Email
- ☐ X/Twitter

Weekly content goal:

_____ ideas × 5 platforms = _____ posts

Time saved vs. agency or manual production:

_____ hours/week = \$ _____ /week reclaimed

Recurring content series I'll build out:

1.

2.

3.

Lock-in question: What's the one weekly insight you have that NO other agent in your market is sharing? Build the content machine around that.

Your 30-Day Profit Plan

Week 1 — Engine Build

- ☐ /listing built and tested
- ☐ Voice profile refined with 5+ past listings
- ☐ First 2 listing kits shipped
- ☐ Time-tracked vs. manual production

Week 2 — Communication System Live

- ☐ /lead built and tested
- ☐ Top 20 sphere contacts re-engaged
- ☐ Post-showing follow-ups standardized
- ☐ One stall-breaker conversion documented

Week 3 — Content Machine Online

- ☐ /content built and tested
- ☐ First weekly content sprint complete (5 platforms)
- ☐ Posting cadence locked (3-5 posts/week min)
- ☐ Cancel redundant content tools

Week 4 — ROI Measurement

- ☐ Production hours: down 15+ hours/week
- ☐ Listing kits shipped: 5+ this month
- ☐ Lead follow-ups: 50+ this month
- ☐ Content posts: 20+ this month

The Compound Effect

By Week 4, your engines, communications, and content all run from one terminal. Tasks that took 60-hour weeks now fit in 20-hour weeks. The other 40 hours? Higher-leverage work — relationships, listings, and strategy. That's where the income compounds.

Your Profit Commitment Contract

Based on today's workshop, I commit to:

Primary Engine Focus: I will master the **Listing Production Engine** first because it will save me _____ hours per listing and let me take _____ more listings per quarter.

Time Investment: _____ hours per week for 4 weeks to build all 3 systems.

Success Metrics

Listing kits shipped per month: _____

Leads followed up per month: _____

Content posts per week: _____

Revenue increase: \$_____ per month within 90 days

Accountability

Accountability Partner: _____

Weekly Check-in: Every _____ at _____ AM/PM

30-Day Review Date: _____

Episode Continuity

- ☐ I will register for Episode 3: Power Plays
- ☐ I will share at least one listing kit win in the mastermind community
- ☐ I will share at least one lead conversion win in the mastermind community

My Signature: _____ Date: _____

Sign it. Photograph it. Send it. Send to your accountability partner before logging off.
Public commitment = 10x execution rate.

Workshop Notes & Monthly ROI Tracker

Live Demo Notes

Demo #1: Listing Engine on a member's actual listing

Demo #2: Lead system on a member's actual lead

Demo #3: Content machine on this week's idea

Monthly ROI Assessment

Month: _____

Metric	Target	Actual
Listing kits shipped	5+	
Leads followed up	50+	
Content posts published	20+	
Hours saved	60+	
Time value	\$3,000+	\$
Subscriptions canceled	1+	
Revenue from system-attributed business	\$5,000+	\$
TOTAL MONTHLY ROI	\$8,000+	\$

Wins to share in mastermind community:

Final Success Checklist & Closing

Before You Leave Today:

- ☐ `/listing` command built
- ☐ `/lead` command built
- ☐ `/content` command built
- ☐ At least one engine run successfully on real input
- ☐ Episode 3 registration completed

This Week:

- ☐ 3 listing kits shipped
- ☐ 20 sphere contacts re-engaged
- ☐ 5 content posts published across 3+ platforms
- ☐ First success story shared in mastermind community

Closing Manifesto

"While my competitors out-source their production and lose their voice, I run my own engine. My listings ship faster. My leads convert higher. My content fills the algorithm. I out-produce 5-person teams while running solo. This is my unfair advantage, and I will press it every single day."

Personal Success Statement:
